INCOME TAX LAW

Delaware last week voted for a federal income tax, and that vote made 36 states, the necessary 3-4, to incorporate the amendment in the Constitution of the U. S. and become automatically a law. The amendment reads:

"That Congress shall have power to levy and collect taxes on incomes, from whatever source derived, without apportionment among the several States and without regard to any census or enumeration."

This is the only way to reach men drawing salaries of from \$10,000 to \$50,000 a year, who own no property, nor will acquire any which would be taxable.

Republicans "view with alarm" the 6 year term as barring Taft. Moosers see nothing to fear for Teddy. When he gets ready to run again, he will do so and prove that it is his first race. Of course. If the last time was his second, the next time will be his first. Arithmetical retrogression settles that question.

Gov. Major appointed a regular and an irregular Republican on the election Board in St. Louis. One case wherein he couldn't choose between the two evils. The law enacted by Republicans made him take both, and now they are the only ones objecting.

Some Moosers look very much like Democrats to Gov. Major. However, he can distinguish a stand - patter clear across the state - when the law says he must.

Will our Chesterfieldian representative fall for the fair faddists' lobbying at Jefferson City? Not him. There's not a 'yung un' in the bunch.

Uncles Joe and Shelby have changed conditions in Illinois by retiring.

People with tropical predilections will see something that will interest them in the Herring drug store window. It is a display of vegetables brought back here from San Juanita, being taken from the growing truck gardens. In the exhibit were lemons, yams, head-lettuce, cabbage, carrots, beets, tomatoes, egg plant and citron.
